KILNDRYING.ORG *Over 250,000 Views as People Have Sought Answers to Lumber Drying Questions*

You are invited to join a forum that is focused on all aspects of lumber drying, where our panel of esteemed industry experts has weighed in on over 95 relevant topics. Some of the top viewed issues are:

- **Mixing wood thicknesses when stacking**
- **General dry kiln maintenance/coils and steam traps**
- **Dry kiln schedules/different thicknesses of the same species**
- **Planer skip**
- **Balancing final EMC/minimum cooling down time for lumber equilibration**

“Everybody has questions about drying and, while nobody has all the answers, there’s a good chance that somebody does have an answer for most questions,” says Dr. Mike Milota. “This forum will be especially important for kiln personnel who are the only ones that understand drying at a mill and have no in-house expert to turn to.”
